

Software development internship Summer 2019 and/or Autumn 2019

Work with back-end development in an international AI start-up.

About us:

ARTificial Mind is a startup that specializes in developing AI personas and machine learning powered humanized technology. We have a unique two-legged DNA. On the one hand, we develop AI solutions in a commercial context, and on the other hand, we explore our wildest ideas by creating art installations all around the world.

Our AI FRANK has been awarded the world leading digital art prize The Lumen Prize 2017 and the British TECHNE Award 2017. ARTificial Mind was founded by digital artist Cecilie Waagner Falkenstrøm, and today we are seven young developers and creatives with a passion for AI.

Internship:

During your internship, you will be working with backend software development in the creative and commercial aspects of our firm. You will get a high level of influence on your projects, and together we will scope your internship, so it to a high degree fits your curiosity and competences.

We expect that...

- You are an experienced Python programmer.
- You have experience with Python web frameworks (e.g. Flask / Django, others).
- You are familiar with deployment and sysadmin tasks on Linux.
- You know your ways with containers (docker).
- You wish to sharpen your unit-testing skills.
- You have an eye for robust software engineering and software architecture.
- You have a high drive, are structured in your work and take initiative.
- You have an entrepreneurial mind.

We offer you...

- The opportunity to help shape a small and rapidly growing codebase.
- Software development work focused on modern web technologies.
- A unique possibility to influence the future of AI technology.
- A workplace at Matrikel1 in the heart of Copenhagen.
- Young, enthusiastic and pretty cool colleagues.

Practicalities:

Internship duration: August 2019 - December 2019 (or summer intern 2019) - we are flexible in terms of start and end dates. Send your cover letter, CV and grade transcript and links to your work. **Contact:** Marie Blatt Bendtsen // mbb@artificialmind.ai // 3192 6522

Deadline 07.06.2019 // Interviews will take place the third week of June.
